

Technical Note

Humaar 101 Liquid

Humaar 101 Liquid

- ❖ Premium Humic acid
- ❖ Increase nutrient exchange and retention
- ❖ Soluble at low and high pH
- ❖ Contains Humic and Fulvic acids
- ❖ Improved soil structure
- ❖ Increases root development
- ❖ Improves stress tolerance
- ❖ Easy mixing with liquid fertilisers
- ❖ Increased yield potential

Humaar 101 functions as a complexing agent for soil nutrients and maintains the soil nutrients in forms that are more readily available to the plant. **Humaar 101** is a unique stabilised Humic and fulvic acid complex. Easily applied to increase soils Humic fraction. It's new formulation allowing for compatible mixing with low and high pH solutions as well as liquid fertilisers without causing any settling. The analysis: 7.9% K, 3%S, 23% Carbon, 4.9% O₂, 31% organic acids (BaCl₂ method) of which 22% Humic and 9% Fulvic.

Humaar 101 superior mixing and compatibilities

Mixed with a low pH solution

Standard Humic acid **Humaar 101**

Mixed with 10:34:0 liquid fert

Standard Humic acid **Humaar 101**

Trials

Potatoes Rothschild's Coloma, Potatoes

Treatment	Yield	Increase
Control	56.6T	
5L/Ha Humaar 101 (placed with liquid fert)	63.22T	6.62T (12%)

Application : Applied directly to the soil or mixed and applied with liquid fertilisers directly to the soil

Rate: 4 – 6.0l/ha in 200l/ha water. **Packaging:** 10l polycans 1000l IBC
